**Course Description:** This course introduces environmental issues from a range of disciplines and perspectives. We begin in **Module I** with an overview of a number of classic works in the field, tracing the intellectual history of modern environmentalism to its roots. **Module II** provides an empirical underpinning for ecosystems and natural resource management. **Module III** applies these empirical tools to international issues, with an emphasis on international environmental law and policy. **Module IV** applies the theoretical, scientific, and policy expertise gained in Modules I-III to the various crises of global food policy in the 21<sup>st</sup> century. The website for this course is [ikessharpless.pbworks.com](http://ikessharpless.pbworks.com).

**Required Texts:** You must have the following texts in class as needed. I recommend that you buy these texts from a discounted used online site like [www.abebooks.com](http://www.abebooks.com). The bookstore should have used copies of the 6<sup>th</sup> edition of *Environment* and the 4<sup>th</sup> edition of *Global Environmental Politics* as well as the newer editions of each book. Either edition of each (4<sup>th</sup> or 5<sup>th</sup> for *GEP* and 6<sup>th</sup> or 7<sup>th</sup> for *Environment*) will be acceptable for this course. However, if you are using the previous edition of either text, it will be your responsibility to identify the appropriate page numbers for each assignment.

- Pamela S. Chasek, David L. Downie, and Janet Welsh Brown. *Global Environmental Politics*, 5<sup>th</sup> edition (2010). ISBN 13: 978-0813344423
- David M. Hassenzahl, Peter H. Raven and Linda R. Berg. *Environment*, 7<sup>th</sup> edition. (2009). ISBN 13: 9780470118573
- [Recommended] Michael Keller. *Charles Darwin's On the Origin of Species: A Graphic Adaptation*. ISBN 13: 978-1-60529-948-8

**Grading**

If you have any questions about whether and how a specific action will affect your grade—or about specific learning disabilities or religious holiday observance, etc.—please send me an email or talk to me directly before/after class.

Grading Scale: on all assignments, the grading scale is as follows: A 4.0 (94 and above), A- 3.7 (90 to 93), B+ 3.3 (87 to 89), B 3.0 (83 to 86), B- 2.7 (80-82), C+ 2.3 (77 to 79), C 2.0 ( to 76), C- 1.7 (70 to 72), D+ 1.3 (67 to 69), D 1.0 (63 to 66) and F (62 and below).

- Short paper (10%)
- Midterm (20%)
- Policy quiz (20%)
- Book critique (25%)
- NGO case study—in-class exercise (5%)
- Attendance (variable, as much as -20%)
  - I will take attendance each class. Two unexcused absences throughout the semester will be permitted, but each additional unexcused absence will lower your grade by a third of a letter.
- Participation (20%)
  - This grade will be based on student uploads to the pbworks website (you are responsible for uploading and commenting on a relevant link for all of the 9 uploads, which are each worth 2% of your grade—2% is free)
  - Although there is no specific course grade for in-class participation, strong participation will be awarded if students are on the cusp of two grades (similarly, weak in-class participation may result in minor penalties)

**Note on Grading Papers:** Be sure to carefully check your work for spelling errors and grammatical flow. You can rewrite any paper if you are dissatisfied with your grade and I will average the two grades. I will also dock your assignment grade by a third of a letter grade for every unexcused calendar day (*not* class day) a paper is overdue.

**Book Critique Guidelines:** I will provide both a list of pre-approved books and paper guidelines on the pbworks page. There is no final exam for this course. Instead, this assignment is intended to allow you to seek greater depth of knowledge in a specific field or subfield that interests you. You are encouraged to select a book of your own choosing, but I will also provide a list of books that would be acceptable to critique. Any book drawn from a source other than the pre-approved list will require my approval, and cannot be a book you have read for another course.

**Academic Honesty:** Plagiarism and cheating will not be tolerated. If you have any questions about what does and does not constitute plagiarism, refer first to the UMass Lowell Undergraduate Catalogue under ‘Academic Integrity’. If you have any further questions, please feel free to contact me by email, phone, or in person. I would much prefer to clarify a small confusion than be forced to give you a failing grade in the class.

**Citation Policy:** Use whichever standard citation format works for you (i.e., MLA, Chicago, etc.), but use the same throughout your work and be sure that all relevant information is included. If possible, include a web citation in addition to—but not instead of—a text citation. While useful for in-class queries and quick references, Wikipedia is not a valid citation source.

## **Course Outline**

\*nota bene – reading assignments are subject to revision anytime up to the class prior to their assignment. If you miss a class, be sure to verify the next day’s readings by checking the pbworks website.
